A MESSAGE FROM THE DIRECTOR

It is an honor to once again supervise and coordinate the rum competition for the **International Rum Conference (IRC)**. I am also very proud to see that the number of rums entered continues to grow. This is proof of the interest in our industry, and a sure sign of its growth.

With this growth, we also experience the need to implement changes that will allow us to adjust to the new quantitative reality we are facing. Among the most salient changes, are the following:

- More focused age categories. The category of “Rums aged 5 Years or Less,” for example, will be divided into two or more categories.
- The Rhum Agricole categories will be changed to better reflect the age and nomenclature standards already adopted by the countries producing these rums.

I believe that these and many other changes we are implementing will allow us to stay at the forefront of an industry that is also continuously changing to adapt itself to a changing market.

I thank all the companies that participated in the competition by sending their rums, our success would not have been possible without them.

Regards,
Javier Herrera
Director, International Rum Conference

OBSERVACIONES GENERALES

Regarding Rum Age Statements: The organizing committee cannot guarantee that the rums listed in the following pages have the ages indicated by the corresponding categories. The legal owners of the rum brands (distillers or brand owners) were required to submit in writing, on a signed document, the age of each one of the rums entered into the competition. The organizing committee reserves the right to withdraw any medals assigned, and to ban rums in future competitions, in cases where the age statement is proven to be incorrect.

Medal Distribution: The statistics for the 332 rums entered into the competition are as follows:

Double Gold = 7%, Gold = 16%,
Silver = 17%, Bronze = 17% and no medal = 43%.
